Solar Activity

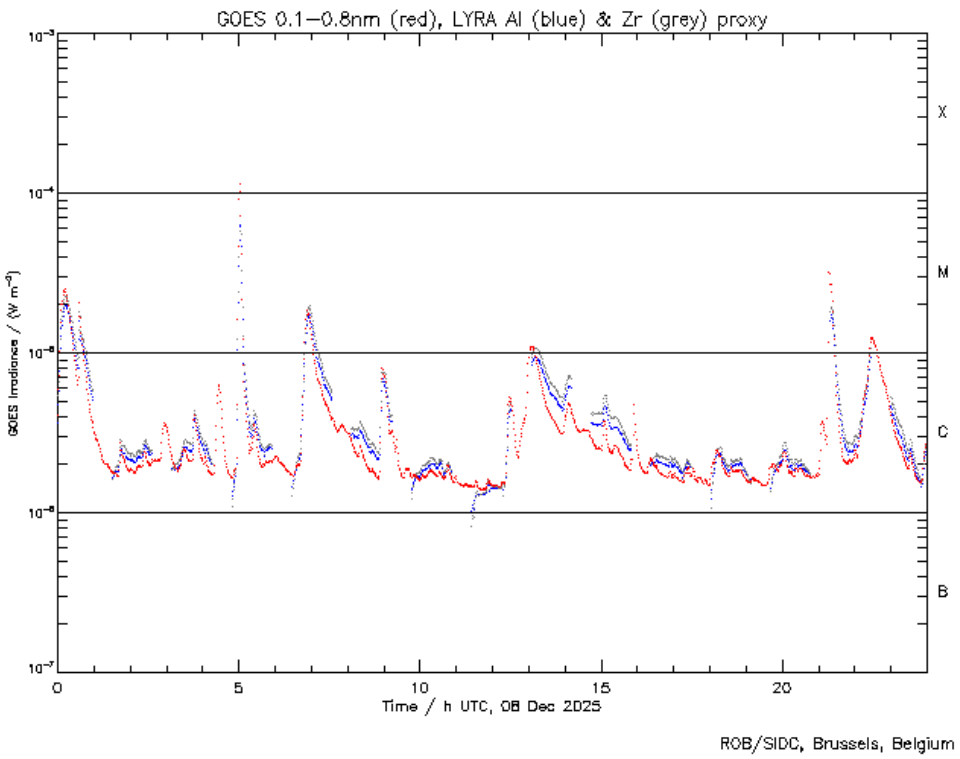
Solar flare activity fluctuated from low to high during the week.
In order to view the activity of this week in more detail, we suggest to go to the following website from which all the daily (normal and difference) movies can be accessed: https://proba2.oma.be/ssa
This page also lists the recorded flaring events.

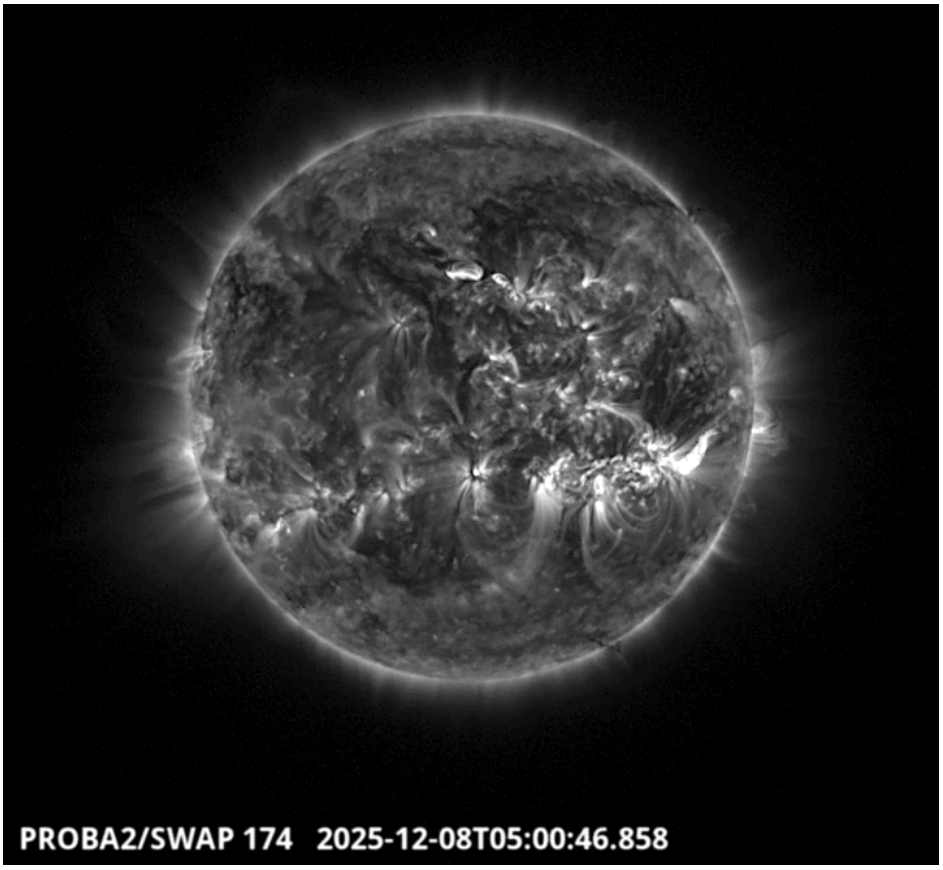
A weekly overview movie can be found here (SWAP week 820).

Details about some of this week's events can be found further below.

If any of the linked movies are unavailable they can be found in the P2SC movie repository here

Monday Dec 08



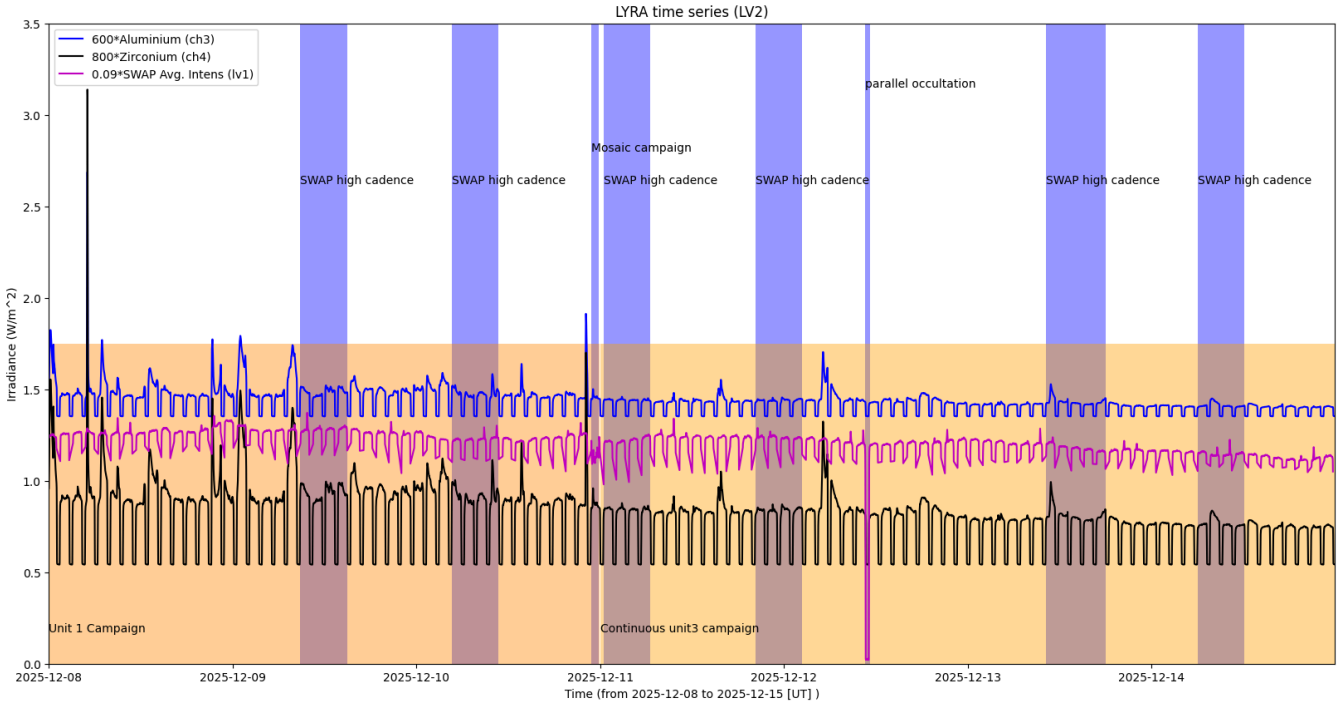


The largest flare of this week was an X1.1, and it was observed by LYRA (top panel) and SWAP (bottom panel). The flare peaked on 2025-Dec-08 at 05:01 UT and occurred in the south-western quadrant of the Sun, originating from active region NOAA4298 (SIDC 713).

Find a SWAP movie of the event here.

An overview of the weekly LYRA & SWAP data is provided below:
The following curves are visible:

- black: Zirconium Channel LYRA Unit 2
- blue: Aluminium Channel of LYRA Unit 2
- purple: SWAVINT (SWAP Average Intensity; integrated solar intensity per SWAP image pixel)



Operations and Calibrations:

The blue shaded periods related to SWAP, correspond to, from left to right:

- SWAP high cadence for joint campaign with ASPIICS, 2025-Dec-09, 2025-Dec-10, 2025-Dec-11, 2025-Dec-12, 2025-Dec-13, 2025-Dec-14
- SWAP weekly mosaic, 2025-Dec-10
- SWAP and LYRA parallel occultation, 2025-Dec-12

The orange shaded periods related to LYRA correspond to, from left to right:

- Unit 1 flare campaign, started during previous reporting period and ended on 2025-Dec-10 at 23:59 UT
- Continuous Unit 3 campaign, from 2025-Dec-11 at 00:01 UT onwards

7. APPENDIX Solar Activity Definitions

In the science section we use the following solar activity standards.

The standard scale for solar activity is:
- very low (almost no flares, only B)
- low (a few C flares)
- moderate (many C flares and at least an M flare)
- high (several M flares and an X flare)
- very high (continuous background of C flares, numerous M flares, more than one X flare)
